EDUCATION

2023-Present

UNIVERSITY OF SCIENCE AND
TECHNOLOGY - THE UNIVERSITY OF
DANANG

- Bachelor of Information Technology
- GPA: 3.83/ 4.0

SKILLS

Web Development:

- Frontend: HTML, CSS, JavaScript, ReactJS, TailwindCSS, Responsive Design.

Mobile Development:

- Flutter (Dart)
- Android Studio

Database & API:

- MySQL, Firebase, Supabase, RESTful API, Socket API, JSON, PostMan.

PROFILE

I am a dedicated and curious student with a strong interest in frontend development. I enjoy creating clean and user-friendly interfaces, and I am always eager to learn new technologies and improve my skills. I consider myself responsible, adaptable, and a good team player who is ready to take on challenges and grow in a professional environment.

WORK EXPERIENCE

Mobile Development Intern (Flutter)

10/2025 - PRESENT

Mobile App - SkyTonight

- Developed a 3D planetarium mobile application using Flutter and SceneKit, delivering an immersive astronomical experience.
- Rendered over 8,800 real stars from the Hipparcos catalog with smooth 360° interactive navigation.
- Integrated RESTful APIs to retrieve real-time weather and astronomical data, including stars, planets, and deep-space objects.
- Bridged Flutter UI with native iOS (Swift) to achieve high-performance 3D rendering.

Mobile App - Teleprompter

- Developed a cross-platform teleprompter application using Flutter (Dart) with smooth auto-scrolling script display and a customizable UI (font, speed, theme).
- Integrated AI-powered features using the Gemini API for script assistance and content generation, enhancing user productivity.
- Implemented script management, timer, and recording functionalities, including camera and audio integration for seamless video recording while reading scripts.

Project Basic Learning

8/2025 - 12/2025

Expense Management

- Developed a cross-platform personal finance app using Flutter, enabling users to track income/expenses, manage budgets, and monitor transactions by category.
- Integrated Supabase for backend data management and implemented data visualization (charts) for financial insights.
- Built an AI-powered assistant using Gemini API to provide spending analysis, budget advice, and personalized financial suggestions.
